

HULISA BUSINESS SOLUTIONS

PROPERTY CRM PLATFORM

Standard Operating Procedure

Document Reference	HUL-SOP-CRM-001
Version	1.0
Date	10 September 2026
Prepared by	Hulisa Business Solutions
Classification	Confidential — Internal & Client Use
Status	Active

Built and maintained by Hulisa Business Solutions • support@hulisa.co.za

1. Purpose & Scope

This Standard Operating Procedure (SOP) documents the processes, roles, and guidelines for operating and maintaining the Hulisa Property CRM — a multi-tenant property management platform built and maintained by Hulisa Business Solutions.

The platform is offered as a service to property companies across South Africa. Each client company operates as a tenant on the platform with their own isolated data, users, branding, and settings.

1.1 About the Platform

- Platform name: Hulisa Property CRM
- Built by: Hulisa Business Solutions (Midrand, Gauteng)
- Hosted at: crm.hulisa.co.za/crm
- Architecture: Multi-tenant PHP/MySQL SaaS platform
- First production client: Muga Properties (tenant_id = 1)

1.2 Purpose of this SOP

- Define how the platform is operated day-to-day by Hulisa and tenant clients
- Establish procedures for system maintenance, backups, and updates
- Provide onboarding reference for new tenants and their users
- Document escalation paths for technical issues
- Ensure data integrity and POPIA compliance

1.3 Scope

This SOP applies to:

- Hulisa Business Solutions — platform owners, developers, and support staff
- All tenant clients and their users (super admins, admins, finance admins, agents)
- All data processed within the platform including contacts, leases, invoices, and documents

2. Platform Architecture

2.1 Technical Stack

Component	Technology	Details
Server	Afrihost Bronze VPS	Ubuntu 22.04 LTS, 197.242.148.221
Web Server	Apache 2.4	HTTPS, security headers, mod_rewrite
Backend	PHP 8.1	Custom MVC, REST API, session auth
Database	MySQL 8.0	Database: crm_db, User: crm_user
Frontend	Vanilla JS + CSS	Single Page Application (~8000 lines)
Email	PHPMailer + SMTP	Per-tenant SMTP configuration
PDF Generation	Python + ReportLab	Invoice and statement PDFs
Backups	Bash + Python	Local + SharePoint (Microsoft 365)

2.2 Multi-Tenant Architecture

Every piece of data in the system is scoped to a tenant_id. This means:

- Each tenant's contacts, deals, leases, invoices, and users are completely isolated
- Tenants cannot see each other's data under any circumstances
- Platform superadmin (Hulisa) can access all tenants for support purposes
- Tenant impersonation is available to Hulisa staff — a visible banner shows when active

2.3 Access URL & Credentials

Platform URL	https://crm.hulisa.co.za/crm
Server IP	197.242.148.221
Server Access	SSH: root@197.242.148.221
Database	crm_db (MySQL 8.0)

3. User Roles & Access Control

3.1 Role Hierarchy

Role	Who	Level	Key Capabilities
Platform Superadmin	Hulisa Staff Only	System-wide	Full platform access, tenant management, health monitoring, knowledge base, platform settings, billing
Super Admin	Tenant Owner/Director	Full Tenant	All tenant features, user management, settings, branding, SMTP, reports
Admin	Senior Manager	Tenant (no settings)	Contacts, deals, leases, invoices, team view — cannot manage settings or create super admins
Finance Admin	Accounts Staff	Finance only	Invoices, statements, payments, financial reports
Agent	Sales/Letting Agent	Assigned contacts only	My Work, assigned contacts, deals, listings, leases — no delete, no settings, no financials

3.2 Login Procedure

- Navigate to <https://crm.hulisa.co.za/crm>
- Enter username or email address
- Enter password (minimum 8 characters)
- Click Sign In
- Agents land on My Work — all other roles land on Dashboard

3.3 Creating Users (Tenant Admin)

- Go to Team in the sidebar
- Click + Add User
- Enter: name, email, username, password, role
- Admin cannot create Super Admin accounts — only Super Admin can do this
- New user receives a welcome email with login details

3.4 Password Management

- Admins can reset any user's password from Team settings
- Users can change their own password via the lock icon in the sidebar
- Passwords are stored as bcrypt hashes (cost factor 12) — never plain text
- SMTP passwords are encrypted with AES-256-CBC before storage

4. Key Modules — How They Work

4.1 Contacts

The Contacts module is the core of the CRM. All property clients, leads, tenants, landlords, and owners are stored and managed here.

Adding a Contact

- Click + Add Contact
- Required fields: Full Name, Contact Number, Address or Estate/Complex
- Optional: Email, ID Number, Date of Birth, Type, Source, Tag, Notes
- Source options: Door Knocking, Referral, Pop Up/Show House, Walk In, Listing Portals, Website, Social Media, Manual
- Agents are automatically assigned to contacts they create

Importing Contacts

- Click Import in the Contacts topbar
- Upload Excel (.xlsx) or CSV file
- Supported columns: Name, Phone, Email, ID Number, Complex, Unit, ERF, Address
- System previews before importing — duplicates are flagged

Views

- Flat View: standard table with all contacts
- Estate/Group View: contacts grouped by complex/estate
- My Work (agents only): shows only assigned contacts, grouped by estate

Quick View Panel

- Click View on any contact to open the slide-in panel
- Shows: phone, email, ID, property, activity timeline
- Activity timeline: all notes, emails sent, reminders — newest first
- Log a note directly — saves to timestamped notes log
- Schedule a callback/reminder — email notification sent at due time
- Email button opens composer if contact has email address

Contact Detail View

- Click Full Detail → or contact name for the full page view
- Shows all fields, linked deals, leases, invoices, documents
- Notes tab: full log with author and timestamp
- FICA panel: tracks ID Document, Proof of Address, Bank Statement

- Upload FICA documents directly to the contact

4.2 My Work (Agent View)

- Default landing page for agents
- Estate view: contacts grouped by complex with Call and Toggle buttons
- List view: flat table of assigned contacts
- View button opens quick view panel — stays in My Work
- Back from contact detail returns to My Work (not Contacts)
- All My Contacts button shows full Contacts page

4.3 Deals (Pipeline)

- Kanban board with configurable stages (Settings → Pipeline Stages)
- Each deal: title, type (Sale/Lease/Rental), value, commission, expected close, linked contact, linked listing, agent
- Drag and drop cards between stages
- Reports view: agent performance, deal values, commission totals

4.4 Listings

- Property inventory available for sale or rent
- Fields: title, ref, type, price, beds, baths, parking, floor size, status
- Upload photos — set primary (shows in listings table thumbnail)
- Click photos to open lightbox with prev/next navigation
- Link a client contact to a listing
- Filter by type and price range

4.5 Leases

- Manage rental agreements and tenancy records
- Fields: tenant, property, unit, monthly rent, deposit, start/end date, lease type
- Dashboard shows leases expiring within 60 days
- Automated email notifications sent 30 and 60 days before expiry
- Repairs tab: log and track maintenance requests
- Documents tab: upload lease agreements and addendums

4.6 Invoices & Billing

Creating an Invoice

- Click + New Invoice
- Select linked lease — tenant auto-populates
- Set due date and add line items (description, qty, unit price, discount)

- Toggle VAT 15% if applicable
- Invoice is assigned reference number (INV-XXXX) on save

Invoice Tabs

- One-Time: manually created invoices
- Monthly: automated recurring invoice schedules
- Reports: revenue, outstanding, overdue with CSV export
- Products: catalogue for quick line item selection
- Customers: billing contacts for invoicing
- Bank Accounts: company banking details for invoice footer

Sending Invoices

- Click Send Email — invoice PDF attached automatically
- Payment details and invoice reference included in email
- Email log records every email sent against the contact

Monthly Automated Invoices

- Set up under Monthly tab — link to lease, set amount and day of month
- Cron job generates invoices automatically each month (runs 6:00 AM daily)

4.7 Reminders & Notifications

- Set reminders from quick view panel or contact detail view
- Fields: type (Call/Meeting/Site Visit/Follow-up/Video Call), date/time, note
- Cron runs every minute — sends email to agent when reminder is due
- Reminder appears in bell notifications and contact activity timeline
- Calendar invite (.ics) to be attached to reminder emails (in development)

4.8 Help & Support

Support Tickets

- Click Help & Support in sidebar → Support Tickets tab → + New Ticket
- Fields: title, category, priority, description, screenshot upload
- On submit: email to support@hulisa.co.za + confirmation to user
- Track status: Open → In Progress → Resolved → Closed
- Reply to tickets from within the CRM

Knowledge Base

- Articles, PDFs, Word documents, links organised by module
- Managed by Hulisa platform superadmin
- Accessible to all tenant users

Video Tutorials

- Training videos per module
- Links to external videos or embedded content
- Managed by Hulis platform superadmin

5. Email & Communications

5.1 SMTP Configuration (Per Tenant)

Each tenant configures their own email sending credentials in Settings → SMTP:

- Host (e.g. smtp.gmail.com or smtp.office365.com)
- Port (587 for STARTTLS)
- Username and password (Gmail App Password supported)
- From email address
- Password is encrypted (AES-256-CBC) before being stored in the database

5.2 Email Types

Email Type	Trigger	Recipient
Invoice	Manual send from invoice	Tenant/contact
Statement	Manual generate	Tenant/contact
Reminder	Cron — due time reached	Agent who set reminder
Bulk email	Manual — bulk action on contacts	Selected contacts with email
Quick email	Manual — from contact quick view	Individual contact
Support ticket	New ticket submitted	support@hulisa.co.za + submitting user
Ticket reply	User replies to ticket	support@hulisa.co.za
New user	User account created	New user

5.3 Email Signature

- Configured in Settings → Email Signature
- Text signature: name, title, company, phone
- Image signature: company logo or banner (PNG/JPG max 1MB)
- Automatically appended to all outgoing emails

5.4 Hulisa Support Email

Support Address	support@hulisa.co.za
-----------------	----------------------

All support tickets from tenants are routed to this address. Hulisa staff respond via email or through the platform superadmin ticket management interface.

6. Backup & Recovery

6.1 Backup Schedule

Time	Job	Output	Retention
2:00 AM daily	Database backup	/var/backups/crm/db/	7 days local
2:00 AM daily	Application files	/var/backups/crm/files/	7 days local
2:30 AM daily	SharePoint upload	luvilne.sharepoint.com/.../ CRM Backups/	Indefinite

6.2 Backup Contents

- Database: full MySQL dump of crm_db, gzip compressed (.sql.gz)
- Files: full application at /var/www/html/crm (vendor excluded), compressed (.tar.gz)

6.3 Verifying Backups

- SSH to server: tail -20 /var/log/crm_backup.log
- SharePoint: check CRM Backups folder for today's date files
- Platform Health Monitor (Hulisa superadmin) shows system status

6.4 Database Restore

Step 1 — Get backup file:

Download from SharePoint or: scp root@197.242.148.221:/var/backups/crm/db/crm_db_YYYY-MM-DD.sql.gz ./

Step 2 — Restore:

```
gunzip < crm_db_YYYY-MM-DD.sql.gz | mysql -u crm_user -p'Hulisa@2025!' crm_db
```

Step 3 — Verify:

```
mysql -u crm_user -p'Hulisa@2025!' crm_db -e "SELECT COUNT(*) FROM contacts;"
```

6.5 Files Restore

Step 1 — Back up current:

```
mv /var/www/html/crm /var/www/html/crm_old
```

Step 2 — Extract:

```
tar -xzf crm_files_YYYY-MM-DD.tar.gz -C /
```

Step 3 — Restart Apache:

```
systemctl restart apache2
```

6.6 Afrihost VPS Snapshots

- Log into Afrihost Client Zone → Cloud Servers → mugacrm.dedicated.co.za
- Enable automatic snapshots
- Take manual snapshot before any major updates

7. System Maintenance

7.1 Cron Jobs

Schedule	Script	Purpose	Log File
Every minute	send_reminders.php	Send due reminder emails	/var/log/crm_reminders.log
6:00 AM daily	generate_scheduled_invoices.php	Generate monthly invoices	/var/log/crm_invoices.log
6:00 AM daily	update_lease_status.php	Update lease statuses	/var/log/crm_cron.log
7:00 AM daily	auto_notifications.php	System notifications	/var/log/crm_auto_notif.log
8:00 AM daily	lease_notifications.php	Lease expiry warnings	/var/log/crm_notifications.log
Every 15 min	health_check.php	Record health metrics	/var/log/crm_health.log
2:00 AM daily	backup.sh	Local DB and files backup	/var/log/crm_backup.log
2:30 AM daily	sharepoint_backup.py	Upload to SharePoint	/var/log/crm_sharepoint.log

7.2 Health Monitoring

Hulisa superadmin → Platform Health shows real-time and historical metrics:

- Active sessions, API response time, DB response time
- Disk usage, memory usage
- Overdue invoices count across all tenants
- PHP errors in last hour
- 24-hour metrics history

7.3 Planned Maintenance Procedure

- Notify all tenant super admins at least 24 hours in advance via email
- Take a manual database backup before starting
- Schedule during off-peak hours (10 PM–4 AM SAST)
- Test all changes before considering complete — test as each role type
- Notify tenants when maintenance is complete
- Document all changes in the changelog

7.4 Applying Code Updates

- SSH to server: `ssh root@197.242.148.221`
- Back up before changes: `bash /var/www/html/crm/scripts/backup.sh`
- Make changes to `/var/www/html/crm/`
- PHP changes take effect immediately — no restart required
- Run PHP syntax check: `find /var/www/html/crm/api -name "*.php" -exec php -l {} \;`
- Test as platform superadmin, super admin, admin, and agent

- Update changelog with version and changes made

8. Onboarding a New Tenant

8.1 Step-by-Step Process

Step 1 — Create tenant in platform:

- Log in as Hulisa platform superadmin
- Go to Platform → Tenants → + New Tenant
- Enter: company name, slug, email, phone, plan, status
- Save — tenant is created with a unique tenant_id

Step 2 — Create super admin user for tenant:

- Go to Platform → Tenants → click the tenant → Add User
- Create super_admin account with temporary password
- Send credentials to the tenant contact

Step 3 — Configure tenant settings (tenant does this):

- Company name, logo, brand colours
- SMTP email settings
- Bank account details
- Pipeline stages

Step 4 — Import initial contacts (if applicable):

- Prepare Excel/CSV with contact data
- Use Contacts → Import to bulk upload

Step 5 — Create additional users:

- Tenant super admin creates admin, finance admin, and agent accounts
- Assign contacts to agents

8.2 Tenant Checklist

Task	Who	Status
Tenant created in platform	Hulisa	
Super admin account created	Hulisa	
Credentials sent to client	Hulisa	
Company settings configured	Tenant Super Admin	
Logo uploaded	Tenant Super Admin	
SMTP configured and tested	Tenant Super Admin	
Bank accounts added	Tenant Super Admin	
Pipeline stages configured	Tenant Super Admin	
Agent accounts created	Tenant Super Admin	
Contacts imported	Tenant Super Admin / Hulisa	
Knowledge base reviewed	Tenant Super Admin	

Task	Who	Status
First invoice test sent	Tenant Super Admin	

9. Security & POPIA Compliance

9.1 Data Security Measures

- All passwords stored as bcrypt hashes (cost factor 12)
- SMTP passwords encrypted with AES-256-CBC
- Sessions use cryptographically secure random tokens stored in DB
- HTTPS enforced — SSL certificate via Afrihost
- Apache security headers: HSTS, X-Frame-Options, X-Content-Type-Options, Referrer-Policy
- Tenant data isolation enforced at API level — `tenant_id` on all queries
- Role-based access enforced on both frontend (JS) and backend (PHP API)

9.2 POPIA Compliance

- Personal information collected only for property management purposes
- Data is not shared with third parties without consent
- Users can be deactivated (not deleted) to preserve audit trail
- Contact records can be deleted by admins when lawfully required
- FICA documents stored securely and accessible only to authorised users
- Support tickets are confidential between tenant and Hulisa
- All email communication is tenant-to-client — Hulisa does not access tenant emails

9.3 Incident Response

- If a security incident is suspected — immediately notify Hulisa: support@hulisa.co.za
- Hulisa will investigate access logs and activity logs
- Affected user accounts will be suspended pending investigation
- Tenants will be notified within 72 hours of a confirmed data breach (POPIA requirement)
- Restore from backup if data integrity is compromised

10. Support & Escalation

10.1 Support Channels

Channel	How to Access	Best For
In-CRM Tickets	Help & Support → + New Ticket	Bugs, questions, feature requests
Email	support@hulisa.co.za	Urgent issues, billing, account queries
Knowledge Base	Help & Support → Knowledge Base	How-to guides, documentation
Video Tutorials	Help & Support → Video Tutorials	Training, learning the system

10.2 Support Tiers

Tier 1 — Tenant Super Admin:

- User account creation and password resets
- Contact assignments and data entry questions
- Invoice and billing queries from their own team
- General how-to questions (refer to Knowledge Base first)

Tier 2 — Hulisa Support (support@hulisa.co.za):

- System bugs and errors
- Feature requests and enhancements
- SMTP and email configuration issues
- Data recovery and backup requests
- Performance issues

Tier 3 — Hulisa Development Team:

- Critical system failures
- Security incidents
- Database corruption or data loss
- Server infrastructure issues

10.3 Response Times

Priority	Description	Target Response	Target Resolution
Urgent	System down, no access, data loss	2 hours	4 hours
High	Major feature broken, billing affected	4 hours	1 business day
Medium	Feature not working as expected	1 business day	3 business days
Low	Minor UI issue, enhancement request	3 business days	Next release

11. Version History & Changelog

Version 1.0 — 10 September 2026

Initial Production Release — Hulisa Property CRM

Platform Infrastructure:

- Multi-tenant SaaS architecture with full data isolation per tenant
- Platform superadmin dashboard: tenant management, health monitoring, billing, settings
- Tenant impersonation with return-to-platform banner
- System health monitoring with 24-hour metrics history
- Automated daily backups (local + SharePoint off-site)
- Help & Support centre with ticket system and knowledge base

Core CRM Modules:

- Contacts: estate grouping, import (Excel/CSV), bulk actions, FICA tracking
- Deals: Kanban pipeline with configurable stages and reports
- Listings: photo management with primary photo and lightbox
- Leases: repairs, documents, notes, automated expiry notifications
- Invoices: PDF generation, email delivery, automated monthly schedules
- My Work: agent-focused view with estate and list modes
- Complex Search across all modules
- Agent Leaderboard

Communication Features:

- Per-tenant SMTP email configuration (Gmail, Microsoft 365 supported)
- Invoice and statement PDF email delivery
- Bulk email to selected contacts
- Quick email from contact view
- Email signature (text + image)
- Email logging per contact
- Reminder scheduling with email notifications (every minute)

Activity & Tracking:

- Contact activity timeline (notes, emails, reminders — unified view)
- Timestamped notes log with author tracking
- Bell notifications for lease expiry, notes, reminders
- Notes preview in contacts list

Security & Compliance:

- bcrypt password hashing, AES-256-CBC SMTP password encryption
- Role-based access control (5 role levels)
- HTTPS, security headers, session token authentication
- POPIA-compliant data handling

First Production Tenant:

- Muga Properties (tenant_id = 1, muga-properties slug)
- 498+ contacts imported from Midrand Village estate
- Active leases, invoices, and agent team configured

Appendix A — File Structure

Path	Description
/var/www/html/crm/	Application root
/var/www/html/crm/index.php	Main SPA entry point and API router
/var/www/html/crm/assets/js/app.js	Main JavaScript (~8000+ lines)
/var/www/html/crm/assets/css/main.css	Main stylesheet
/var/www/html/crm/assets/css/mobile.css	Mobile responsive styles
/var/www/html/crm/includes/config.php	DB credentials and constants
/var/www/html/crm/includes/mailer.php	PHPMailer email sender class
/var/www/html/crm/includes/auth.php	Session authentication
/var/www/html/crm/includes/crypto.php	AES-256 encryption/decryption
/var/www/html/crm/api/	All REST API endpoints
/var/www/html/crm/api/invoices/generate_pdf.py	Invoice PDF generator (Python/ReportLab)
/var/www/html/crm/api/statements/ generate_statement.py	Statement PDF generator
/var/www/html/crm/scripts/	Cron job scripts
/var/www/html/crm/uploads/	Uploaded files (photos, docs, logos)
/var/backups/crm/	Local backup storage
/etc/crm-backup.conf	SharePoint/Azure credentials (chmod 600)

Appendix B — Database Tables

Table	Purpose
tenants	Tenant organisations on the platform
users	All user accounts across all tenants
sessions	Active user sessions (token-based)
contacts	Property contacts per tenant
contact_notes	Timestamped notes log per contact
contact_reminders	Scheduled reminders per contact
contact_documents	FICA and other uploaded documents
email_log	Record of all emails sent per contact
deals	Property deals and transactions
listings	Property listings
listing_photos	Photos per listing with primary flag
leases	Rental lease agreements
lease_repairs	Maintenance/repair requests
invoices	Invoice records
invoice_lines	Line items per invoice
invoice_schedules	Monthly automated invoice schedules
invoice_customers	Billing contacts for invoicing
products	Product/service catalogue
notifications	Bell notification records
support_tickets	Help & support tickets
ticket_replies	Replies on support tickets
knowledge_base	Knowledge base articles and resources
activity_log	System activity audit trail
system_health	Health check metrics history
platform_settings	Hulisa platform-level settings
tenant_settings	Per-tenant configuration (SMTP, branding, etc.)

Appendix C — Key Contacts & Credentials

Role	Contact	Details
Platform Developer & Support	Hulisa Business Solutions	support@hulisa.co.za
Server Provider	Afrihost	support@afrihost.com · Client Zone: my.afrihost.com
Microsoft 365 / Azure	Hulisa IT Admin	portal.azure.com · luvilne.sharepoint.com
First Tenant — Muga Properties	Muga Admin	admin@mugaproperties.co.za

Appendix D — Outstanding Development Items

The following features are planned or in progress as of Version 1.0:

- Calendar integration — .ics calendar invites attached to reminder emails
- Customer calendar invite — send calendar invite to contact when reminder is set
- Invoice tracking — view all sent/downloaded invoices with download links
- PayStack Pay Now button on invoices
- BaseCloud payment system integration
- Maintenance mode — platform superadmin can put system in maintenance with tenant notification
- System update notifications — alert tenants when new version is deployed
- Platform superadmin ticket management — view and respond to tickets from platform side
- Email reply threading — support@hulisa.co.za replies thread back into tickets
- Mobile layout polish (ongoing)
